

DE-MOUNTABLE ROAD MARKING UNIT

TECHNICAL INFORMATION

DE-MOUNTABLE ROAD MARKING UNIT

Utilising existing hook-mount technology, Somerford De-Mountable Road Marking Unit can be loaded, connected and ready to use in under 30 minutes. The demountable body system can accommodate any suitable skid-mountable equipment body type, including gritter bodies, skip mounts, recycling units and hot boxes. The system provides the perfect multi-application solution and best value from a single fleet vehicle.

A compatible prime mover can now be utilised throughout the full calendar year for numerous different applications. With the ability to carry out a change of vehicle use quickly and easily, work planning can be altered to accommodate unexpected programme changes such as seasonal variations, or availability of operatives:

FEATURES

- Multi-use single vehicle means significantly lower carbon footprint
- Rapid change system delivers operational flexibility
- All services connected at single point
- Change-over completed in under 30 minutes
- Robust design
